1. Comment. This is the first shipment to the new fuel depot in Eiesenthal which is presumably subordinate to the Fourth Gds Mecz Army. The depot is still being enlarged. It was said that the former fuel depot of the Fourth Gds Mecz Army in Eberswalde-Eisenspalterei has been turned over to the air force.
2. Comment. The installation at Schleife, is a large fuel depot of the GDRG. To date, it appears that fuel is only rarely dispatched from the depot and that the depot is being immediately refilled from hydrogenation plants in East Germany. There are indications that Schleife is a reserve depot with a capacity of about 5,000 metric tons.
